QUALITY YOU CAN RECOGNISE

WHAT MAKES A CINELLI DUVET INSERT SPECIAL

FILLING

A **Cinelli duvet insert** is made of down clusters—the lightest and most impalpable part of the feather—and small feathers. The finest and most precious raw material comes from geese raised in Eastern Europe. Weight is also essential: for the same volume, the higher the quality of the down, the lower its weight.

FABRIC

Made from 100% pure cotton, it guarantees perfect breathability.

The use of ultra-fine, tightly woven yarns prevents down and small feathers from escaping.

ANTIBACTERIAL AND HYPOALLERGENIC

All Cinelli bed duvets are NOMITE® certified, meaning that every Cinelli product is hypoallergenic and antibacterial. Before manufacturing, the filling undergoes a strict sanitisation protocol that eliminates bacterial load. The tightly woven outer fabric not only prevents down and small feathers from escaping, but also blocks dust penetration, thereby preventing the formation of an environment conducive to dust mite proliferation.

FILL POWER

Among its many qualities, down offers exceptional filling capacity. Fill power is the ratio between the weight and volume of the filling, commonly measured in CUIN (cubic inches per ounce).

The higher this value, the more valuable the filling.

CINELLI DUVETS:

SUITABLE FOR EVERY WARMTH REQUIREMENT, VERSATILE AND COMFORTABLE

Browse through our catalogue to discover a wide range of solutions designed to meet every need: style, seasons and different climates. Choose top Italian down performance according to the indicated temperature.

Double, single or queen-size, hypoallergenic and carefully finished at every production stage, **Cinelli duvets** ensure optimal rest and maximum breathability, always offering a comprehensive response to every need in terms of warmth and softness.

WARMTH RATING GUIDE:

EXTRA WINTER *****

Ideal when the room is not heated, in very cold conditions or for all those who are particularly sensitive to the cold.

WINTER ****

This version is recommended for winter climates when the bedroom is heated for only a few hours a day.

SPRING ***

A winter duvet for well-heated rooms with bedroom temperature around or above 20°C, or for use during mid-season.

SUMMER **

The Summer model is the perfect solution for mid-season use in areas with a mild climate and in air-conditioned rooms between 20°C and 23°C.

SUMMER LIGHT *

When indoor and outdoor temperatures are warm, around 25°C, or with air conditioning set at 24°C and above, the Summer Light model is recommended.

4 SEASONS

A pair of duvets joined with practical buttons: use them together on the coldest nights and separately when winter is milder or in summer.

TRACEABILITY AND ANIMAL WELFARE

Cinelli goose down is certified and fully traceable - a true jewel of lightness, designed to deliver wellbeing.

We have always been committed to carefully selecting and monitoring our suppliers, sourcing down and feathers exclusively from carefully chosen European farms that do not practise live-plucking or any other procedures that may cause unnecessary suffering to geese. All animals are guaranteed a good quality of life, raised outdoors, and none of our feathers are taken from live geese, as certified by the traceability protocols we adhere to for feather sourcing.

NOMITE® CERTIFIED HYPOALLERGENIC DUVETS

Our goose-down products are ideal for those who are sensitive to house dust.

The washing and sterilisation processes applied to down and feathers comply with EN12935 hygiene and cleanliness requirements and ensure that the material is sanitised and sterilised before it is used in our products.

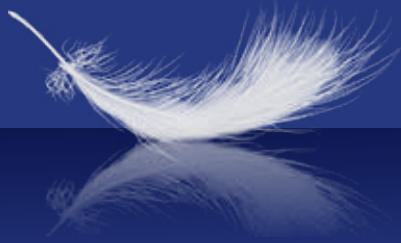

Mite proliferation is prevented by using downproof fabrics with a very tight weave, which limits dust penetration and effectively prevents the formation of an environment suitable for mite proliferation. These are two of the key requirements for obtaining NOMITE® certification.

CINELLI NATURA FOR A NATURAL CHOICE

Natura is Cinelli's new product line designed to lighten our environmental impact.

Cinelli Natura consists of two product lines.

The **Iris line** is made exclusively from GOTS-certified **organic cotton**, for which no chemicals are used at any stage of the production process. Inside, you will find **recycled down certified to the Global Recycled Standard (GRS)**, which does not involve animal farming or the use of new natural resources for raising animals.

The **Mistral line** offers ideal comfort, especially in the warmer seasons. **Linen** is lightweight, durable and breathable, helping to regulate body temperature and absorb moisture. **Cotton** adds softness and gentleness to the touch. Together, they create a fresh, pleasant, and naturally antibacterial and hypoallergenic sleeping environment, promoting healthy and restorative rest.

CARE AND MAINTENANCE TIPS

A **Cinelli duvet** insert is not just a simple purchase: it's a long-term investment in your wellbeing and that of your family. It will stay with you for years, continuing to provide maximum comfort, absolute hygiene and the right warmth for your body—giving you moments of pure pleasure and quality comfort. A quality that will remain unchanged over time: just follow a few easy-care instructions for maintenance.

WASHING

Feathers do not fear high temperatures, but they do fear bleach. To protect fabrics, washing in water and soap at 30–40°C is recommended. For dry cleaning, consult the instructions on the label first.

RINSING

Rinsing must be very thorough and repeated several times to remove all traces of soap and prevent halos on the fabric.

DRYING

Open air drying is ideal, away from direct sunlight. Tumble drying is permitted at medium temperatures.

STORAGE

During the winter period, airing the duvet for a short time helps maintain it in good condition. When not in use, store in a dry place inside its original bag. Make sure the duvet is completely dry and not damp.

EXCLUSIVE CINELLI SERVICE

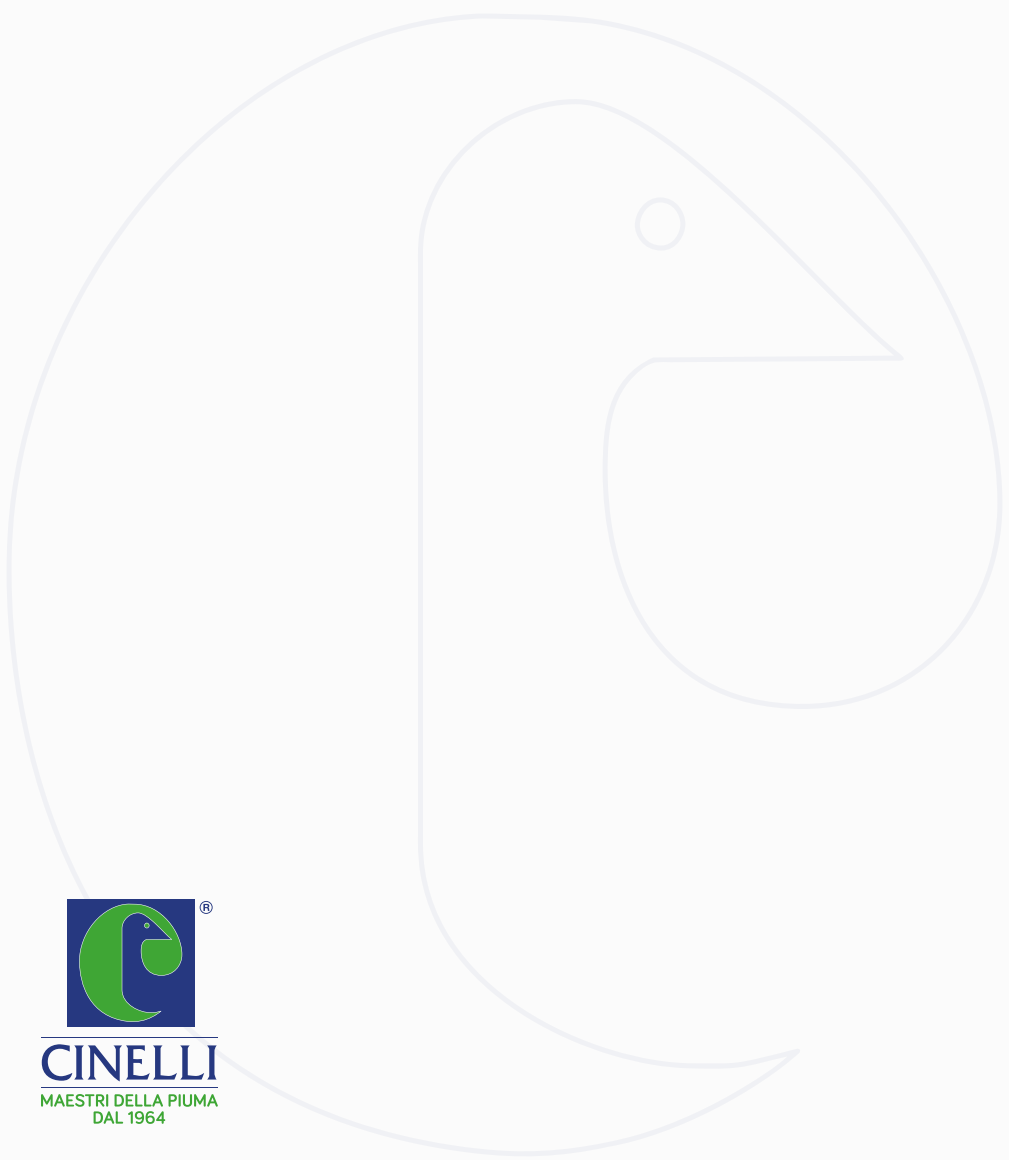

Cinelli offers an exclusive duvet washing service. Simply take it to the shop where it was purchased, in its original bag, and the retailer will send it directly to the manufacturer, who will wash it professionally and return it to the shop.

DUVETS, PILLOWS DUVET INSERTS

QUALITY IS MADE IN TUSCANY SINCE 1964

Cinelli is Italy's leading down specialist: from its processing come all our bedding products—pillows, duvets, duvet inserts and mattress covers. We also have extensive expertise in producing top-quality semi-finished products for the clothing and furniture industries. Cinelli is one of the very few companies in the sector that manages the entire production cycle within a single facility. From selection and washing of down and feathers to their sterilisation for filling, right through to final assembly: everything takes place at our plant in Buggiano, in the heart of the Tuscan hills.
